Profile

Master of Data Science (High Distinction) graduate from Deakin University with prior experience as a Data Scientist at Telkom Indonesia. Experienced in machine learning, computer vision, data analytics, and Azure AI services. Awarded Best Research Paper at ICCSCI 2021 and Microsoft Azure AI certified. Seeking opportunities in Data Science, Data Analytics, Machine Learning, or Software Development roles.

Employment History

Sep 2022 – Mar 2023 **Data Scientist,** Telkom Indonesia, Jakarta, Indonesia.

- Developed a computer vision project focused on employee face detection, achieving 80% accuracy across 1,000 employee faces.
- Built a multi-class machine learning model, improving the accuracy and efficiency of company-specific data analysis processes by 5–6% over the previous model.
- Collaborated with cross-functional teams to gather requirements, ensuring alignment with business objectives and user needs.
- Provided comprehensive documentation, integration, and knowledge transfer for stakeholders.

Oct 2025 – Present **UV Lamination & Foil Specialist,** Prima PMI, Melbourne, Australia.

- Progressed from a casual role supporting Calender, Guillotine, and Shipping operations into the dedicated, sole-operator position for UV lamination systems, reflecting increased trust and responsibility within the production environment.
- Independently operate and maintain UV lamination equipment, managing machine calibration (heat, speed, feed) and performing real-time troubleshooting to ensure consistent, high-quality output during continuous high-volume production.

Projects

Grape Disease Classification – VGG-16 + XGBoost
CNN feature extraction + gradient-boosted classifier, deployed via Flask

- Combined VGG-16 feature extraction with XGBoost to classify leaf disease images, outperforming pure CNN baselines (98.7% vs. 92–96% accuracy).
- Built and deployed a Flask web app for end-to-end image-to-prediction inference.

Projects (continued)

- **Smart Recycling** – Waste Classification Pipeline
  PyTorch, data augmentation, domain generalization
  - Built a CNN pipeline classifying waste into 3 bin categories, improving test accuracy from 69.5% to 82.98% via BN/Dropout/Pooling tuning.
  - Profiled and optimized the data-loading pipeline (∼5–6x speedup) and tested model robustness on out-of-domain images.
- **CSER: Context-Sensitive Emotion Recognition** (IEEE, under review)
  Multimodal deep learning – Vision Transformers + Vision-Language Models
  - Co-authored a multimodal framework fusing ViT, LLaVA, and BLIP embeddings, achieving 40.5% mAP (EMOTIC) and 54.3% mAP (HECO), outperforming SOTA.
  - Led experimental design and dataset curation under limited GPU/compute resources.
- **NYC Flight Weather Dashboard** – Tableau & Power BI
  BI-tool data wrangling and visualization
  - Built parallel Tableau and Power BI dashboards analyzing wind speed/precipitation across 3 NYC airports, with all transformations done natively in-tool (no external scripting).
- **BHFMS – Boarding House Finder & Management System** (Bachelor's Thesis)
  Vue.js, Tailwind CSS, Inertia.js, Laravel, SQL, AWS Lightsail
  - Co-developed a full VILT-stack marketplace and operations platform for Indonesian boarding houses, unifying search, payments, chat, reviews, and admin verification.
  - Implemented distance-aware search (Haversine formula) and a Bayesian-average rating system for fair property rankings.

Education

Nov 2023 – Jun 2025 — **Master of Data Science (Professional), Deakin University**, Burwood, Australia.
- Graduated with High Distinction.
- Awarded the Deakin International Scholarship (merit-based).

Aug 2019 – Aug 2023 — **Bachelor of Computer Science (Global Class), Bina Nusantara University**, Tangerang, Indonesia.
- Student exchange at Kaunas University of Technology, Kaunas, Lithuania (Jan – Jul 2022).
- Graduated with a GPA of 3.85 / 4.00.
- Best Research Paper award at ICCSCI 2021.

Technical Skills

Programming Languages	Python, SQL, R.
Python Libraries	PyTorch, TensorFlow.
Cloud / DevOps	Azure, Docker, Jenkins.
Data Analytics & Visualization	Tableau, Power BI.

Technical Skills (continued)

Tools — Microsoft Office Suite, Git, VS Code.

Certifications & Professional Development

May 2024 — **Microsoft Certified: Azure AI Engineer Associate (AI-102).** Microsoft.

Microsoft Certified: Azure AI Fundamentals (AI-900). Microsoft.

Mar 2022 — **Learn with Google AI: Explore ML.** Google.

Nov 2021 — **Best Research Paper Award,** 6th International Conference on Computer Science and Computational Intelligence (ICCSCI) 2021.

Aug 2018 — **Finalist,** SGU Mobile Application Programming Competition, Swiss German University, Indonesia.
